### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

***Claim Rejections - 35 USC § 112***

Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The scope of the claims is indefinite. Initially, "A slat structure" is recited. However, thereafter, the claims alternate between reciting one slat, a plurality of slats and a method of making the slats. For examination purposes, a single slat, i.e. "A slat structure" will be examined. Additionally, claims that recite "can be" do not actually recite the features that follow this phrase. Consequently, these claims (2-4, 7) do not contain limiting structure.

Claim 3 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The term "food-used and transparent fastening agent" is not understood.

***Specification***

The disclosure is objected to because of the following informalities: on page 4, "cutting areas 401", line 14, is inconsistent with other mentioning of "401".

Appropriate correction is required.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zorbas in view of Colson et al.

Zorbas discloses a woven fabric that has support sticks 24 in lateral pockets thereof. What is not shown is the "hard" aspect of the fabric via layers of adhesive. However, Colson discloses using a rigidifying material 68, Fig. 5, which is on both sides of the fabric slat. It would have been obvious to modify Zorbas to have such a stiffening material (adhesive) applied thereto to also rigidify his slats. Colson et al also teaches using such slats for vertical slats and for providing holes for the hanging of the vertical slats, Fig. 9. It would have been obvious to use the rigidified slats as vertical slats, in view of this teaching by Colson et al.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
